## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-17 and 19 are allowed.
2. The following is an examiner's statement of reasons for allowance:

With regard to claims 1, 17, and 19, Warren (USPN 5,963,909) discloses a method to enforce access to a media file (column 1 lines 8-10) including partitioning the media file into sequential data blocks (column 3 lines 8-9), encrypting the data blocks with a plurality of encryption keys (column 3 lines 9-15) transferring the data blocks and the keys to a client (column 5 lines 44-49) wherein the frames are sent in portions over a communications network (column 5 lines 47-49), each frame is individually encrypted, and since the key may be carried in a key layer, the frames can be decrypted in a frame by frame basis (abstract lines 17-20), and the keys are sent according to access status (column 1 lines 15-24). Warren does not disclose the sender selecting less than all of the decryption keys to be sent to the receiver. There is no motivation to add this limitation to warren, and thus it would not have been obvious to one of ordinary skill in the art.

The examiner further notes that systems were found where a sender sends encrypted media to a receiver and the receiver can select desired portions that he wishes to purchase the decryption key for, such as Spies et al., USPN 6,055,314. What the examiner could not find is a system that does this with one partitioned media file, as is claimed in claims 1, 17, and 19. It would not have been obvious to add this limitation

to systems such as Spies' without the benefit of hindsight, after reading applicant's specification.

Claims 2-16 are dependant on claim 1, and are allowable for at least the reasons given above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
